Kay - I don't have any particular comments on the presentation, but I have couple of things to think about that might come up in your presentation. First, does BLM have access to Superfund monies, or is that only EPA? Second, if someone were to file a citizen suit under the Clean Water Act to force EPA to issue a NPDES permit to BLM for the American Tunnel, then presumably, BLM would initiate a removal action under CERCLA to protect itself. That removal action would probably involve ongoing treatment which force BLM to come up with a mechanism to fund it.

Subject: Kays comments on Sabrinas powerpoint

(See attached file: KZ Comments on Powerpoin t8_12_11.docx)

Here are my brief (probably not politically correct) comments and questions. In general, I think this is a good presentation, but could still

use some refinement. Just so things get off to a smooth start, I think

Peter and Sabrina could coordinate significantly on the first few slides,

and how they fit with what Peter will summarize.

(See attached file: BLM CERCLA upper Animas Aug 2011version 2.pptx)
I'm also sending out what my powerpoint currently says. There will
be a bit
more wordsmithing, but content unlikely to change much. Comments
are
welcome.
